

SABINE

MUSIC ACCESSORY CATALOG

Sabine changed the way musicians tune-up when we introduced the first ST-Tuner in 1986. Now we are the world leader in tuner technology, producing a complete line of innovative and affordable tuners designed to satisfy the needs of every player. And we've expanded that leading-edge thinking and applied it to include metronomes, contact tuners and all in one accessories. All of our music accessories are built with pride and backed by our two-year warranty.

TUNERS

ZOID - Z1000

ZOID - Z2000

STX1100

- Automatic Note Sensing
- Bright Multi-colored LEDs
- Quarter-inch Instrument In & Out Jacks
- Built-in Microphone
- Battery included FREE!

ZOID - Z1000 / Z2000 / Z3000M

All the convenience of a clip-on tuner, but this one has the rock-solid Sabine tuning algorithm. Just clip it onto your instrument and the Zoid instantly displays the note you play. The bright two-color LCD and the high-resolution needle combine to tell you exactly where your note is and the LCD fires bright green when you are in tune.

Tune with the clip that transfers the note directly to the tuner - great for noisy rooms. Or tune with the built-in mic if you want to share the tuner. (Z1000 & Z2000)

Sabine's well-known accuracy gives you confidence in your tuning, and the Zoid lets you tune amazingly fast. This is a truly professional instrument tuner, backed by Sabine's two year warranty and unmatched customer service.

If you're ready for precision, reliability, and speed, you're ready for the Zoid!

ZOID-1000

- 6 octave tuning range

STX1100 Chromatic AutoTuner

The STX-1100 has been the choice of professionals for almost 20 years. The STX1100 features fast, automatic note sensing and bright, easy-to-use LED display with contrasting LEDs that indicate guitar notes. Advanced tuner technology grabs notes faster and holds them longer. Rugged design and broad chromatic range make this tuner the choice of the pros. Use the 1/4" input and output jacks or the built-in microphone. Handy clips hold the tuner on your music stand. Includes one-touch auto-recalibration and sleep-mode battery saver.

"The industry standard for tuning accuracy"

STX1100

- Transpose Function:** Display notes in any key
- Manual Recalibration:** Change overall calibration from 435 to 445 Hz
- Tone Generator:** Outputs tone over a two-octave range
