# MetroTune™

FROM SABINE

**In Tune.  
In Time.  
Every Time!**

This is the music product you've been waiting for. Introducing Sabine's new **MetroTune MT-8000**. The MetroTune combines everything you need from a metronome and a chromatic tuner into one low-priced unit. It's the perfect tool for every musician, especially band and orchestra performers who need the benefits of both products in one small package.

Both the tuner and the metronome are simple to use — just select a function and use the up/down keys to find your perfect setting. Use the sweeping LED tuner display to tune your instrument, then to precisely check your tuning on every note you play, displayed in any key. The sweeping LED display gives you a powerful visual cue showing your intonation on every note. Switch to metronome mode and now the display sweeps to the beat — you can set the accented downbeat for any time signature. Plus you get all these great features:

- Built-in wire stand tilts the unit for table top viewing or mounts right on your music stand
- Settings memory — holds your settings for both the tuner and metronome when you turn it off, and comes back on just the way you left it.
- Super-bright LEDs for easy viewing
- Free battery or plug in 9V power supply (not included)
- Two-year Warranty

Get proven Sabine tuner and metronome technology at a great price, without compromising features and quality. Visit your Sabine dealer today and get one for you and one for a friend!

**Built-in bracket mounts on music stand or tilts for easy tabletop viewing.**

## FUNCTIONS

### Metronome

- Loud, wood block tone, with volume control — hear the MT-8000 over loud instruments
- Accented downbeat, 2 to 7 beat phrases — great for practicing difficult parts
- Set tempo from 40 to 208 beats per minute
- Sweeping LED display makes it easy to stay on the beat, even with the volume off

### Tuner

- Automatic and chromatic — perfect for standard and alternate tunings
- Transpose to any key — MT-8000 displays the right note for your instrument
- Built-in microphone
- Calibrate from A = 438 to 445 Hz
- Sweeping LED display acts like a bar graph — clearly shows how sharp or flat you are in cents. Double green LEDs light when you're in tune!
