

# **AX3000 Series Contact AutoTuner**

AX3000

## **Important Tips**

AX3000-W

### **Mounting on your instrument:**

The new MagnaPad requires very little pressure to stay on when sticking to your instrument. Use very slight pressure when mounting the AX3000. It acts like a magnet - place it on your instrument, and give it a twist to remove.

We do not recommend leaving the AX3000 on your instrument indefinitely. When you are finished playing store the tuner in its Dome Home to keep it clean and protect it from all the foreign objects lurking in your instrument case.

## **Instrument and MagnaPad cleaning tips:**

If the MagnaPad gets dirty use plain water or standard isopropyl rubbing alcohol to wipe it clean. Use a clean, lint-free cotton cloth to wipe it off and let it air dry. Do not use any other cleaning methods or chemicals. Store the AX3000 in its Dome Home when not in use.

If over time any dirt or smudges occur where the AX3000 is being placed on your instrument use Martin Guitar polish or equivalent to clean it off. If this doesn't completely clean it then use Meguiar's Mirror Glaze Professional ShowCar Glaze #7 or equivalent to polish the finish.

*NOTE: Please read the entire manual and cautions before using your new AX3000 tuner.*
