

NexTune™ 12z & 6z

Tuners from Sabine

Sabine is proud to announce the addition of two new products in its line of superior tuners. The NexTune 6z Guitar & Bass Tuner and the NexTune 12z Chromatic Tuner are LCD-based tuners with extremely fast automatic note sensing and Sabine's well-known tuning accuracy.

Both NexTune models include a built-in tone generator for tuning or ear training, and an instrument input as well as a built-in microphone for acoustic tuning. Two simultaneous tuning displays are available: the extra-big LCD with its simulated needle display, or a three-color LED display. Both tuning indicators clearly show how sharp or flat you are, and both give you instant indication when you are in-tune.

(actual size)

The NexTune 6z has both Guitar and Bass modes, and the bass mode allows for tuning 5-string basses. The NexTune 12z is fully chromatic and is perfect for most string and wind instruments.

Great for beginners or professionals, both NexTunes include Manual calibration from 438 to 443 Hz, and both come with Sabine's two-year warranty and free batteries.

Both NexTunes feature:

- Superior Sabine Digital Tuning
- Automatic Note Sensing
- Built-in Mic and Speaker
- Instrument Input
- Two Displays:
 - Big LCD with simulated needle
 - Three-color LEDs
- Built-in Folding Stand
- Compact Size
- Two-year Warranty
- Free Batteries (2 AAA)
