

Guide to Creating Sabine Navigator Part Numbers

Use this guide to generate the correct model number and price for your Sabine Navigator. This example shows how you would create a part number for a 4x8 Navigator, with a blank front panel and Ethernet connectivity, with the optional Mic Preamps, Digital Audio I/O, and the connector for the Wall Panel Remotes. You may choose less options and in this case your part number will be shorter.

Options in this order!

Step Number	1	2	3	4	5
Example	NAV4802-S-	M	D	R-	U

Step 1

Choose your Base Model

Choose from either front panel control or a blank front panel

Example List Price = \$1799.95

Step 2

If needed, choose your First Option

Mic Preamps

- for all models
- price is model dependent

Example List Price = \$169.95

Step 3

If needed, choose your Second Option

Digital Audio Input/Output

- only for NAV4802 or 8802
- price is model dependent

Example List Price = \$499.95

Step 4

If needed, choose your Third Option

Wall Panel Remote-ready (*Wall Panel not included*)*

- for all models
- same price for all models

Example List Price = \$159.95

Step 5

Choose your Voltage

This is country dependent.

U is for USA 120V

Complete Part Number and Net Price for this model

NAV4802-S-MDR-U \$2,629.80

Part numbers vary in length according to the options chosen. For example, if you need this model without the Digital I/O, then the model number would be NAV4802-S-MR-U

*One more thing!

Because the NAV4802-S-MDR-U has the option to connect the Wall Panel Remote, you should order one or more of these.

NAVRC-100 \$299.95
